MILAN SINKS

DURABILITY IN DESIGN

YOUR CHOICE OF THREE LUXURIOUS FINISHES

INSTALLATION PROFILES

The rim of the sink after installation appears underneath the worktop.

The rim of the sink appears underneath the worktop.

The rim of the sink appears at exactly the same level with the worktop.

OVERFLOW

All Milan Sinks have overflow to protect from water flooding. The overflow can be either in the bowl or on the drainer of the sink.

PYRAGRANITE

Premium Durability

CERTIFICATIONS

Except from the strict quality controls carried out, Pyragranite sinks are also certified by LGA institute, which reassures that the sinks comply with the most demanding quality standards in regards with their durability and hygiene.

COMPOSITION

Milan sinks consist of 80% natural quartz (silica), while the remaining 20% of the mixture consists of resins and other substances that assist in binding.

HEAT RESISTANCE

These sinks can resist heat even after contact with object that has reached a temperature of 200° C.

SHOCK RESISTANCE

Resistance to shock even when hit by an object of 1 kg weight which drops from a height of 70cm.

RESISTANCE TO CHEMICALS

Pyragranite Sinks resist strong chemical cleaners without discolouration.

SCRATCH RESISTANCE

Surface reinforced by extra hard gel for additional anti-scratch properties.

SAFETY

Mold, stains and unpleasant smells are often caused by bacteria. Pyragranite homogenous, without pores, surface prevents the bacteria accumulation making your sink cleaner and safer.

GLASS

Stylish & Sleek

SAFETY

Mold, stains and unpleasant smells are often caused by bacteria. Milan Glass Sinks sleek surface, prevents bacteria accumulation with easy cleaning and high degree of hygiene, making your sink safe to use.

MATERIAL

Our Milan Glass sinks are made from a combination of 8mm toughened glass tops and 18/10 grade stainless steel. They are available as on trend, ultra sleek black and high white tempered coloured glass.

POP-UP WASTE VALVE

Our Milan Glass sink series include a pop up square waste valve with bowl overflow that will not compromise the efficiency of your sink drainage system.

Stainless Steel Sinks are provided with a pre-installed sealant of polyurethane underneath the sink, thus, the installation of an inset becomes much easier and friendlier since, the sealant that is already installed and saves time compared to other sealing methods.

STAINLESS STEEL

Seamless & Strong

CERTIFICATIONS

Except from the strict quality controls carried out, Pyragranite sinks are also certified by LGA institute, which reassures that the sinks comply with the most demanding quality standards in regards with their durability and hygiene.

COMPOSITION

Milan Stainless Steel sinks use traditionally the best quality performance Stainless Steel material AISI304. The typical composition is 18% Chromium and 10% Nickel that makes Milan Stainless Steel sinks extremely resistant to rust or corrosion in normal household conditions.

HEAT RESISTANCE

Milan Stainless Steel sinks can resist heat, even after contact with object that has reached a temperature of 200° C.

SHOCK RESISTANCE

Resistance to shock even when hit by an object of 1 kg weight which drops from a height of 70cm.

SAFETY

For even greater safety, the surface of Stainless Steel sinks provide protection against bacteria and makes the sink perfectly healthy and suitable for food contact.
